In addition, this information is based on IBM's current product plans and strategy, which are subject to change by IBM without notice. IBM shall not be responsible for any damages arising out of the use of or otherwise related to, this publication or any other materials. Nothing contained in this publication is intended to, nor shall have the effect of, creating any warranties or representations from IBM or its suppliers or licensors, or altering the terms and conditions of the applicable license agreement governing the use of IBM software.

References in this presentation to IBM products, programs, or services do not imply that they will be available in all countries in which IBM operates. Product release dates and/or capabilities referenced in this presentation may change at any time at IBM's sole discretion based on market opportunities or other factors, and are not intended to be a commitment to future product or feature availability in any way. Nothing contained in these materials is intended to, nor shall have the effect of, stating or implying that any activities undertaken by you will result in any specific sales, revenue growth or other results.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon many factors, including considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve results similar to those stated here.

Lotus Protector 2.5 & Notes 8.5.1 

Black- & Whitelist

The screenshot displays the Lotus Protector for Mail Security Blacklist/Whitelist Management interface. The interface includes a search bar, a table with columns for Name, Entry, and Multi-domain, and a 'No results were found' message. A small 3D character with a sword and shield is positioned to the right of the screenshot.

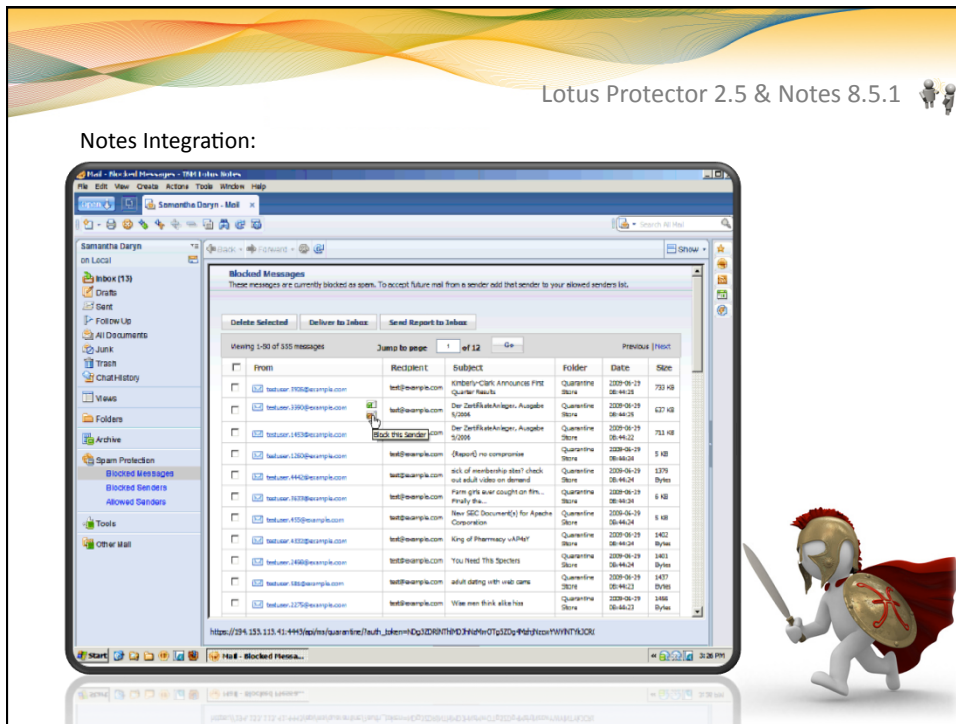

Lotus Protector 2.5 & Notes 8.5.1 

Notes Integration:

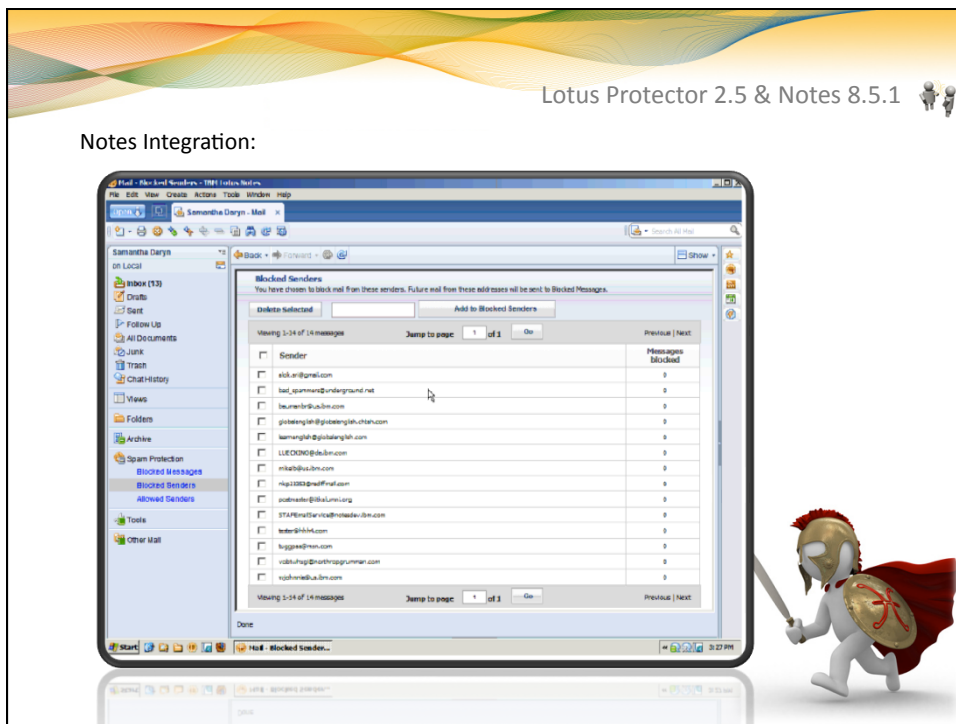

The screenshot shows the Lotus Notes Mail - Inbox interface. A blocked email from 'vobbtvxgl@northropgrumman.com' is visible, with a 'Spam: Block Senders Mail' dialog box open. The dialog box contains the text: 'Block Mail From: vobbtvxgl@northropgrumman.com. Mail from these addresses will be delivered directly to Blocked Messages at Protector.' A small 3D character with a sword and shield is positioned to the right of the screenshot.

Notes Integration:

Notes Integration:

Lotus Protector 2.5 & Notes 8.5.1 

Notes Integration:

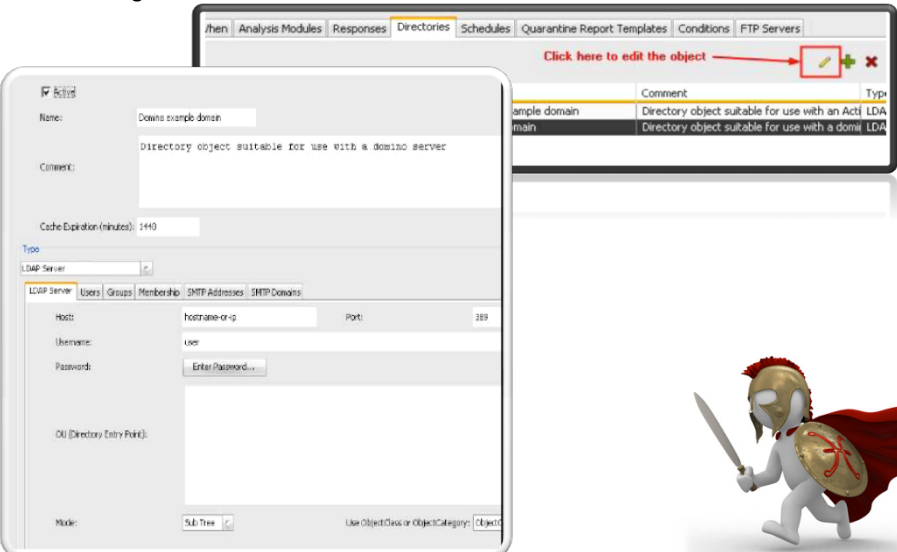

- Item**
Specify "\$PROTECTOR_LOCATION"
- Value**
Input the Protector server's address to use in one of the following formats:

https://address:port/ (e.g. https://protector1.mycompany.com:4443/)
https://ip:port/ (e.g. https://192.168.2.42:4443/)
address:port (e.g. protector1.mycompany.com:4443)
ip:port (e.g. 192.168.2.42:4443)

Lotus Protector 2.5 & Notes 8.5.1 

Notes Integration:

The screenshot shows the 'Directories' window with a table of directory objects:

Name	Comment	Type
sample domain	Directory object suitable for use with an Acti...	LDA
main	Directory object suitable for use with a domi...	LDA

The 'LDAP Server' dialog box is open, showing fields for Name, Comment, Cache Expiration (minutes), Type, LDAP Server, Host, Username, Password, OU (Directory Entry Point), and Mode.

ENDE
